In 1999, Hufcor designed and manufactured the tallest operable partitions in the world for the Korea World Trade Center in Seoul Korea. Since then, Hufcor has built hundreds of convention center panels in numerous countries that have come close to Korea's record height of 57'6".

While not every facility has the need for an almost 60-foot operable panel, Hufcor has the capability of not only manufacturing them – but designing them for ease of movement and fast setup.

Ask for Hufcor operable partitions for your facility and be assured of top quality and performance for years to come.

If you have a sizeable challenge in your next project, call Hufcor, world leader in flexible space management.
