Hufcor, Inc. Introduces the Smartition™ Rotating Wall System

Hufcor, the world's leading provider of operable partitions introduces the Smartition™ rotating wall system – a bold new product for optimal use of interactive whiteboard technologies for education. Smartition rotating wall systems offer schools an efficient option for sharing classroom technology. Pre-designed with internal data and electric cabling, SMARTITION walls allow classes to be taught with the same or different curriculum by the same teacher if necessary.

Smartition rotating walls are a complete, turnkey wall system. The rotating door is supported by Hufcor's patented Unispan overhead support system, specifically designed with center pivoting hinge. The design allows the doors to be installed in new or existing schools, because no special support structure is needed.

Hufcor's global leadership in space flexibility are in tune with new trends in school design. In addition to SMARTITION, Hufcor's new acoustical glass operable partitions allow classrooms both acoustical space division with optimal daylighting. Continued flexible uses of space and the added security of seeing within a classroom. Furthermore, the Hufcor Hydrau-Lift bifold doors are a perfect option for a school's building envelope. The Hydrau-Lift bi-fold and single lift doors allow complete curtainwalls to be opened up and classrooms to "flow" out into exterior learning spaces. The only bifold glasswall system to offer tested air, water and wind loading performance, the Hydrau-Lift door offers solid U-Factors and SHGC to help schools effectively manage variable heating and cooling conditions for classrooms and flexible space to the outdoors, all in one.

As part of Hufcor's commitment to be the global leader in our industry, Hufcor continually strives to improve effectiveness, and to develop solutions that enable customers such as hotels, for example, to increase revenue with flexible space management. Hufcor currently has thousands of installations in hotels, convention centers, schools, and commercial offices. Hufcor is represented by an expansive global network of manufacturing operations, exclusive licensees, distributors and sales offices that excel at providing flexible space management innovation and a focus on international business solutions.

Hufcor Inc., headquartered in Janesville, Wisconsin, is the world leader in the manufacture and distribution of quality flexible space management solutions. Hufcor is the premier single source provider of Operable Partitions, Moveable Glasswall Partitions, Vertical Lift Partitions, Accordion Partitions, and Bi-Fold Doors. Hufcor innovation also created the FlexTact™ Tactical Training Wall System for tactical training facilities and the Smartition Rotating Wall System for the education market. Hufcor has a reputation for products with exceptional quality and durability. Hufcor partitions are available through local, factory-trained Distributors, offering design assistance as well as installation and service.
